Rubic

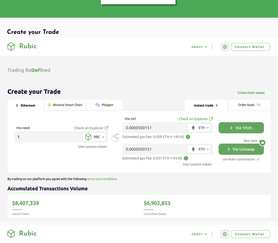
First Multichain DeFi Platform

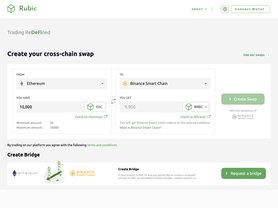
Rubic is a first multichain DeFi ecosystem which features cross-chain, P2P, instant swaps, and limit orders across multiple blockchains, aiming to deliver a complete ONE-STOP decentralized platform.

TRON · ethereum · BINANCE SMART CHAIN · polygon

Rubic DEX is live

Create your Trade





Rubic features

- Multichain Support: Ethereum, Binance Smart Chain, Polygon & TRON networks
- Instant Swaps (Ethereum, BSC, Polygon)
- No volume limits
- Ability to make crowdsales
- Public/Private deals
- Limit Orders for Ethereum
- Creation of Custom Bridges
- Custom token support
- Percentage of platform revenue can be regulated
- Brokers support
- Stops scams and 'rugpulls' from happening
- Truly decentralized OTC platform
- iFrame Widget

Rubic's contract

Who we are

Our team released several crypto projects since 2017 such as:

MYWISH – the leading platform for Smart contracts builders for 6 blockchains (NEO, Ethereum, TRON, EOS, RSK, and WAVES) supported by

TRON · BINANCE · neo · OKEX

Our team developed products and worked with NEO, Qtum, Ducatum Waves, Ereceum, Axioverse network and many others.

QURAS · DUCATUS · waves+ · AXION

How To Use

Cross-chain Swaps

Complete swaps between these networks: BSC <> Ethereum, Polygon <> Ethereum, Ethereum -> TRON and BSC -> TRON

Multichain Support

Current Blockchains: Ethereum, Binance Smart Chain, Matic, and TRON. With more to come

Instant Trade

Execute Instant Trades on ETH, BSC and Polygon using external DEXs. (to get customers the best possible rates)

Limit Order

Set the desired rate and your deal will be executed automatically when one of the DEXs meets the parameters of your deal

BNB Faucet

Buy BNB using RBC. Buying BNB with RBC will also include discounts!

Routing System

Trade your crypto while paying less gas fees thanks to Rubic optimization

P2P Trade

Create your trade and choose your own terms

Tokenomics

Rubic platform has an ERC-20 token, "RBC", which is used as the fuel within the Platform.

Platform generates revenue from instant trades, bridge fees and others. 50% of the revenue will be sent to Liquidity, while the other 50% will be used for operational needs.

Our platform will charge the users for the following operations:

Trade creation	Brokers function usage	Token listing	Crowdsale contract usage	Others services

Fees can be in RBC, Ethers, TEX or BNB depending on blockchain.

Accounting with Reliquary, external services, marketing services are made in RBC token.

- 10% of tokens is reserved for the team. All tokens are locked, and every 3 months they will be unlocked by 2% (over a year)
- 8% of tokens is directed at conducting marketing and bounty campaigns. 4% of tokens are frozen for 4 months.
- 8% of tokens are distributed to MyWish holders and will be unlocked every 3 months by 2% (over a year).
- 66% of tokens are put up on the market
- 8% of tokens are allocated for Uniswap Liquidity.

Roadmap

Q1. 2021

- New Blockchain & DEX Integrations
- Binance Smart Chain Instant Trades
- Cross-Chain Solutions For ETH And BSC
- Mobile Support
- Limit Orders For ETH
- Creating BRBC And Building Rubic Bridge For RBC-BRBC
- Custom Token Support
- Custom Bridges Feature
- Custom Routing System

Q2. 2021

April

- Custom Token Support
- Custom Bridges Feature
- Custom Routing System
- Cross-Chain Solution For TRON

Q3. 2021

May

- CoinGecko And CoinMarketCap API For ETH+xBSC
- TRON Integration
- BNB Faucet
- Instant Trades Table
- UI Simple Update

Q4. 2021

June

- UI Update Stage 2 -
- New Wallets Support -
- WalletConnect + WalletLink (Coinbase) -
- Merch Shop -
- CoinGecko & CMC All Pairs Reporting -
- FIAT Integration -
- Uniswap V3 -
- New Blockchain/Bridge Integrations (Candidates: Avaxscan/XDai, BECO, Moonbeam, - Fantom, Avalanche, RootBTC)
- MATIC Faucet -
- Uniswap Updates -

Q1. 2022

July

- Cross-Chain Routing
- New Blockchain/Bridge Integrations
- UI Update Stage 3
- Commission in RBC - stage 1

August

- Commission in RBC - Stage 2 -
- Anonymizer V1 Polygon -

Q3. 2022

September

- New Bridge Integrations
- New Blockchain Integrations

Q4. 2022

- Staking/Farming Introduction -
- Governance -
- Mobile App -
- API For External Usage -
- New Blockchain Integration (L2) -
